3. Operating Instructions
(1) Press and hold the button (1) for more than 4 sec, the green
LED (2) will light about 1 sec. The indicator is switched on
successfully.
(2) When the indicator is on, the green LED (2) will flash once
every 10 min.
(3) When the indicator is on, it defaults 10 min delay and then
measures temperature. The default measuring interval is 30 sec.
If users need, it can be customized to 1 min.
(4) When the measured ambient temperature is beyond the tempera-
ture range cumulatively for 30 min or 4°C (including 4°C), the red
LED alarm indicator (3) will flash once every 10 sec, and the
green LED indicator (2) will not flash at 10 min interval.
(5) Once the indicator is switched on, the button (1) will be disabled.
If the button is pressed at this time, the red or green indicator will
not flash.
